

**Title:** Maintenance Figure of Merit (MFOM) Systems Engineer

**Specifics:**

**Location:** San Diego **Tax term:** FY11

**Pay rate:** Based On Experience

**Job description:**

This position will work directly with the Support Command and Control (PMW150) Program Office and provide general engineering and Maintenance Figure of Merit (MFOM) support to the Assistant Program Manager- Engineering (APM-E) and staff.

Candidates must be able to operate in a fast-paced environment in which engineers are expected to provide rapid responses to emergent data calls from Department of Defense acquisition decision-makers in San Diego, Washington D.C. and elsewhere. Superb communication skills, both verbal and written are essential. Expertise in using the following software suites is also crucial:

**Deliverables:**

- Update Cost Analysis Requirements Document (CARD)
- Update Program Life Cycle Cost Estimate (PLCCE)
- Document existing installation procedures (Afloat and Ashore sites)
- Document and Maintain Cost Model for installation efforts (software and hardware)
- Document and Maintain Cost Model for hardware procurement (Afloat and Ashore sites)
- Coordinate documentation with Engineering Team to include Ship Change Documents (SCD), Software Delivery Document (SWD), System Operational Verification Test (SOVT), Test and Evaluation and Information Assurance documentation
- Coordinate Integrated Logistics Support (ILS) Certifications with ILS team
- Coordinate with the Advanced Planning Team for Fleet Readiness Certification Board (FRCB) requirements
- Define and monitor fielding plan strategy
- Support all necessary meetings

**Required Skills:**

- Microsoft Office (Excel, Project, Power Point)
- Public Speaking

\*\* Ability to hold a Secret clearance required

**Education:**

Bachelor's degree desired (not required) and two (2) or more years of related experience on designated systems. Six (6) additional years of experience can be substituted for a degree.
