Sentek Global receives second \$32 million Navy contract in as many months

- Company to provide program management, engineering support to SPAWAR's Test, Evaluation, Certification Department -

SAN DIEGO – December 7, 2010 - Sentek Global, a rapidly growing provider of government and commercial IT security and consulting programs, announced its second, five year, \$32 million U.S. Navy contract award in as many months.

The company will provide information assurance certification and accreditation as well as technical advisory services to the Space and Naval Warfare Systems Command's Test, Evaluation and Certification Department.

"We're one of the incumbent companies on this task order, and are honored to be given the opportunity to continue our service to SPAWAR in this capacity," said Cameron Matthews, Chief Technology Officer for Sentek Global. "We pride ourselves in being the most knowledgeable organization on all things related to the Information Assurance (IA) Certification and Accreditation (C&A) process and its impact in information security. We've also got the best and most unique combination of military warfighting and technology leadership that serves us well in ensuring our efforts provide direct benefits to our national security."

Specific work under this agreement will include the review of information assurance certification packages, test and evaluation plans, and spectrum allocation plans.

About Sentek Global

Sentek Global is the firm of choice for supporting and delivering government and commercial information technology solutions, including security, program management, strategic consulting, engineering, software development and acquisition support. The company's services range from IT security assessments, design and implementation to military command and control system engineering.
