Sentek Global receives \$32 million Navy contract

- Company to provide program management, engineering support to the Joint Program Executive Office for the Joint Tactical Radio System -

SAN DIEGO – October 18, 2010 - Sentek Global, a rapidly growing provider of government and commercial IT security and consulting programs, has been awarded a five year, \$32 million U.S. Navy contract task order.

The company will provide program management and engineering support services to the Joint Program Executive Office for the Joint Tactical Radio System (JPEO JTRS), Multifunctional Information Distribution System (MIDS) Program Office.

“We feel we have the best experience combined with the team that possesses the perfect balance of both technology and military expertise to take on this task order,” said Eric Basu, founder and president of Sentek Global. “Our cadre of professionals has developed a reputation for providing unique and invaluable expertise to assist our clients in meeting their requirements, expanding their programs and accomplishing their missions. We’re looking forward to exceeding expectations!”

Sentek Global, whose teammates included intelliSolutions, Odyssey Computing, G2 Software Systems and Booz Allen Hamilton will provide functional services in the areas of acquisition, program management, configuration management, data management and logistics. The team will assist the U.S. Government with the design, development, qualification, procurement and integration of the MIDS-Low Volume Terminals (LVT) and MIDS JTRS terminals. These terminals will ultimately be employed on a wide array of ground, air and sea based platforms enabling interoperable operations within the International, Joint and U.S. Naval Command, Control, Communications, Computer, Intelligence, Surveillance and Reconnaissance (C4ISR) architecture as part of the Network Centric Warfare Doctrine.
